

Buck

We love Buck's energy, so typical of lab puppies. His tendency to be a bit aggressive, however, was not as endearing. Dr. Maggie recommended giving him a natural flower essence blend to calm him. We love it!! Because he likes the taste, it's easy to give him his "dessert" after meals. We can now actually play with him without our hands getting shredded, and he's responding to training better. He just seems happier, and we definitely are. Thanks, Dr. Maggie!
